

## Java Assignment 3a – Loops with numbers

Create a new Java project with a class called TimesTable.

*Object:*

Have the user enter a number and then display the times table of that number (up to 10x):

Upload the completed java code to Edmodo when done (in either .txt or .docx format)

*Example:*

**Give me a number > 6**

**6 x 1 = 6**

**6 x 2 = 12**

**6 x 3 = 18**

**...**

**6 x 10 = 60**
