

Java Assignment 3b – Loops with numbers

Create a new Java project with a class called DoublingScale

Object:

Have the user enter a number and then display a 'double scale' of 5 iterations (repetitions).
The number is doubled, doubled again, and again and again and a last time.

Upload the completed java code to Edmodo when done (in either .txt or .docx format)

Example 1:

Give me a number > 2

**2
4
8
16
32**

Example 2:

Give me a number > 3

**3
9
27
729
553311**
