

Java Assignment 3c – Loops with letters

Create a new Java project with a class called Palindrome

Object:

Have the user enter a 5 letter word. Then reverse the word and display its inverse.

Upload the completed java code to Edmodo when done (in either .txt or .docx format)

Example 1:

Give me a 5 letter word > frodo

The word is in reverse > odorf

Example 2:

Give me a 5 letter word > yahoo

The word is in reverse > oohay
