

Java Assignment 4c – What day is it

Create a new Java project with a class called DayCheck

Object:

Have the user enter a number for evaluation.

If the number is equal to 1, the computer must respond with: "Monday".

If the number is equal to 2, the computer must respond with: "Tuesday".

If the number is equal to 3, the computer must respond with: "Wednesday".

If the number is equal to 4, the computer must respond with: "Thursday".

If the number is equal to 5, the computer must respond with: "It's FRIDAY! FRIDAY!"

If the number is equal to 6, the computer must respond with: "Saturday".

If the number is equal to 7, the computer must respond with: "Sunday".

Upload the completed java code to Edmodo when done (in either .txt or .docx format)

Example output 1:

Enter the number > 3

Wednesday

Example output 2:

Enter the number > 5

It's FRIDAY! FRIDAY!
