

## Java Assignment 1d – Playing with Strings (Capitals)

Create a new Java project with a class called ShoutOut

*Object:*

The program must ask the user for a word.

The program must then store the word in a String called blah.

The program must then display the word in uppercase.

Upload the completed java code to Edmodo when done (in either .txt or .docx format)

*Example output 1:*

```
Enter a word:
cheesecake
Here is the word in uppercase:
CHEESECAKE
```

---

**Solution:**

```
import java.util.*;

public class ShoutOut
{
    public static void main (String args[])
    {
        Scanner keyboard = new Scanner (System.in);
        System.out.println("Enter a word:");
        String blah;
        blah = keyboard.nextLine();
        System.out.println("Here is the word in uppercase");
        System.out.println(blah.toUpperCase() );

        }//end of main
    }//end of class
```
