Java Assignment 4b – HeroCheck (IF)

Create a new Java project with a class called **HeroCheck**

Object:

Have the user enter an number for age evaluation. If the number is smaller than than 10, the computer must respond with the following line: "You are old enough to be a superhero!" If the number is bigger or equal to 10, it must respond with "You are TOO OLD to be a superhero :-(".

Upload the completed java code to Edmodo when done (in either .txt or .docx format)

Example output 1:

Enter your age > 9

You are old enough to be a superhero!

Example output 2:

Enter your age > 15

You are TOO OLD to be a superhero :-(
